Sensors and Actuators B 32 (1996) 241–244

SENSORS AND ACTUATORS B CHEMICAL

Subject Index of Volume 32

Air/fuel sensors
  a new automotive air/fuel sensor based on TiO_2-doped Nb_2O_5 thin film by ion-beam-enhanced deposition, 209
Alkylguanidines
  anion-sensitive properties of alkylguanidines in membrane electrodes and monomolecular layers, 215
Aluminium oxide
  an Al_2O_3 sensor for low humidity content: characterization by impedance spectroscopy, 1
Ammonia
  investigation of an intercalation reaction with implications for chemical sensor science, 19
Amperometric sensors
  amperometric hydrogen sensor for high-temperature water, 57
Anion selectivity
  anion-sensitive properties of alkylguanidines in membrane electrodes and monomolecular layers, 215
Anodic stripping voltammetry
  chemical electrode surface plasmon resonance sensor, 143
Antigen–antibody kinetics
  antigen–antibody diffusion-limited binding kinetics for biosensors: a fractal analysis, 195
Asymmetric ion-selective membranes
  asymmetric membrane-based potentiometric solid-state ion sensors, 161
Automatic gain control
  an electronic oscillator with automatic gain control: EQCM applications, 129
Automotive sensors
  a new automotive air/fuel sensor based on TiO_2-doped Nb_2O_5 thin film by ion-beam-enhanced deposition, 209

Bent lightguides
  NIR spectroscopic application of a refractometric sensor, 203
Binding rate coefficients
  antigen–antibody diffusion-limited binding kinetics for biosensors: a fractal analysis, 195
Biosensors
  antigen–antibody diffusion-limited binding kinetics for biosensors: a fractal analysis, 195

Calorimetric sensors
  calorimetric detection of organic vapours using inclusion reactions with organic coating materials, 71
Capillaries
  optical sensors based on inhomogeneous waveguiding in the walls of capillaries ('capillary waveguide optrodes'), 175
Carbon dioxide
  optical sensors based on inhomogeneous waveguiding in the walls of capillaries ('capillary waveguide optrodes'), 175
Carbon films
  sodium-doped carbon films for humidity sensor construction, 221
Carbon monoxide sensors
  rapid evaluation processes for candidate CO and HC sensor materials; examination of SnO_2, Co_3O_4, and $Cu_xMn_{3-x}O_4$ ($1 < x \leq 1.5$), 49
Cell metabolism
  comparison between a LAPS and an FET-based sensor for cell-metabolism detection, 41
Ceramic sensors
  an Al_2O_3 sensor for low humidity content: characterization by impedance spectroscopy, 1
Chemical electrodes
  chemical electrode surface plasmon resonance sensor, 143
Chemical-imaging sensors
  chemical-imaging sensor using enzyme, 23
Chemical sensors
  first-order surface plasmon resonance sensor system based on a planar light pipe, 137
Clostridium acetobutylicum
  evaluation of the absorption on mild steel of hydrogen evolved in glucose fermentation by pure cultures of *Clostridium acetobutylicum* and *Enterobacter*, 27
Cobalt oxide
  humidity-sensitive optical absorption of Co_3O_4 film, 157
Complex oxides
  influence of Sb/Fe ratio and heating temperature on microstructure and gas-sensing property of Sb_2O_3–Fe_2O_3 complex oxide semiconductors, 185
Copper phthalocyanine
  NO gas-sensing characteristics of copper phthalocyanine film prepared by plasma-activated evaporation, 77
Cycloguanidines
  anion-sensitive properties of alkylguanidines in membrane electrodes and monomolecular layers, 215

Deodorants
  evaluation of the efficiency of deodorants by semiconductor gas sensors, 191
Differential scanning calorimetry
  rapid evaluation processes for candidate CO and HC sensor materials; examination of SnO_2, Co_3O_4, and $Cu_xMn_{3-x}O_4$ ($1 < x \leq 1.5$), 49
Diffusion barriers
  fabrication of polymer electrolyte fuel cell (PEFC) H_2 sensors, 7

Electrochemical sensors
  sodium microsensors based on ISFET/REFET prepared through an ion-implantation process fully compatible with a standard silicon technology, 101
Electrochemistry
  an electronic oscillator with automatic gain control: EQCM applications, 129
Enterobacter
  evaluation of the absorption on mild steel of hydrogen evolved in glucose fermentation by pure cultures of *Clostridium acetobutylicum* and *Enterobacter*, 27

Elsevier Science S.A.

Enzyme
chemical-imaging sensor using enzyme, 23
Enzyme electrodes
development of screen-printed enzyme electrodes for the estimation of fish quality, 107
Equivalent circuit
impedance analysis and circuit simulation of quartz resonator in water at different temperatures, 169
Extracellular acidification
comparison between a LAPS and an FET-based sensor for cell-metabolism detection, 41

α-Fe_2O_3
influence of Sb/Fe ratio and heating temperature on microstructure and gas-sensing property of Sb_2O_3–Fe_2O_3 complex oxide semiconductors, 185
Fermentation sensing
a human-knowledge-based sensor implemented in an intelligent fermentation-sensor system, 227
Fiber optics
sensing fatty acid binding protein with planar and fiber-optical surface plasmon resonance spectroscopy devices, 149
Fibre refractometers
NIR spectroscopic application of a refractometric sensor, 203
Field-effect transistors
dynamic response of a Ta_2O_5-gate pH-sensitive field-effect transistor, 115
Fish quality
development of screen-printed enzyme electrodes for the estimation of fish quality, 107
Fractal dimension
antigen–antibody diffusion-limited binding kinetics for biosensors: a fractal analysis, 195

Gas-diffusion electrodes
fabrication of polymer electrolyte fuel cell (PEFC) H_2 sensors, 7
Gas sensors
fabrication of polymer electrolyte fuel cell (PEFC) H_2 sensors, 7
NO-sensing properties of Au thin film, 15
comparative study of various metal-oxide-based gas-sensor architectures, 61
NO gas-sensing characteristics of copper phthalocyanine film prepared by plasma-activated evaporation, 77
synthesis and gas-sensing characteristics of high thermostability γ-Fe_2O_3 powder, 181
influence of Sb/Fe ratio and heating temperature on microstructure and gas-sensing property of Sb_2O_3–Fe_2O_3 complex oxide semiconductors, 185
a human-knowledge-based sensor implemented in an intelligent fermentation-sensor system, 227
a novel acoustic sensing system for on-line hydrogen measurements, 233
Gold film
NO-sensing properties of Au thin film, 15

High-temperature water
amperometric hydrogen sensor for high-temperature water, 57
Human heart-type fatty acid binding protein
sensing fatty acid binding protein with planar and fiber-optical surface plasmon resonance spectroscopy devices, 149
Humidity detection
an Al_2O_3 sensor for low humidity content: characterization by impedance spectroscopy, 1
Humidity sensors
sodium-doped carbon films for humidity sensor construction, 221

Hydrocarbon gas
synthesis and gas-sensing characteristics of high thermostability γ-Fe_2O_3 powder, 181
Hydrocarbon sensors
rapid evaluation processes for candidate CO and HC sensor materials; examination of SnO_2, Co_3O_4, and $Cu_xMn_{3-x}O_4$ ($1 < x \leq 1.5$), 49
Hydrogen detection
a novel acoustic sensing system for on-line hydrogen measurements, 233
Hydrogen sensors
evaluation of the absorption on mild steel of hydrogen evolved in glucose fermentation by pure cultures of *Clostridium acetobutylicum* and *Enterobacter*, 27
amperometric hydrogen sensor for high-temperature water, 57
Hydrogen uptake
evaluation of the absorption on mild steel of hydrogen evolved in glucose fermentation by pure cultures of *Clostridium acetobutylicum* and *Enterobacter*, 27

Inclusion reactions
calorimetric detection of organic vapours using inclusion reactions with organic coating materials, 71
Inhomogeneous waveguides
optical sensors based on inhomogeneous waveguiding in the walls of capillaries ('capillary waveguide optrodes'), 175
Intercalation
investigation of an intercalation reaction with implications for chemical sensor science, 19
Intrinsic optical sensors
NIR spectroscopic application of a refractometric sensor, 203
Ion-beam-enhanced deposition
a new automotive air/fuel sensor based on TiO_2-doped Nb_2O_5 thin film by ion-beam-enhanced deposition, 209
Ion implantation
sodium microsensors based on ISFET/REFET prepared through an ion-implantation process fully compatible with a standard silicon technology, 101
Ion sensors
asymmetric membrane-based potentiometric solid-state ion sensors, 161
Iron oxide
synthesis and gas-sensing characteristics of high thermostability γ-Fe_2O_3 powder, 181
ISFETs
comparison between a LAPS and an FET-based sensor for cell-metabolism detection, 41

Kinetics
investigation of an intercalation reaction with implications for chemical sensor science, 19
Knowledge-based sensors
a human-knowledge-based sensor implemented in an intelligent fermentation-sensor system, 227

Light-addressable potentiometric sensor (LAPS)
chemical-imaging sensor using enzyme, 23
comparison between a LAPS and an FET-based sensor for cell-metabolism detection, 41
Light pipes
first-order surface plasmon resonance sensor system based on a planar light pipe, 137
Luminescence quenching
fibre-optic oxygen sensor based on luminescence quenching of a Pt(II) complex embedded in polymer matrices, 121

Membrane electrodes
anion-sensitive properties of alkylguanidines in membrane electrodes and monomolecular layers, 215
Metal oxides
comparative study of various metal-oxide-based gas-sensor architectures, 61
Microstructure
influence of Sb/Fe ratio and heating temperature on microstructure and gas-sensing property of Sb_2O_3–Fe_2O_3 complex oxide semiconductors, 185
Mild steel
evaluation of the absorption on mild steel of hydrogen evolved in glucose fermentation by pure cultures of *Clostridium acetobutylicum* and *Enterobacter*, 27
Monomolecular layers
anion-sensitive properties of alkylguanidines in membrane electrodes and monomolecular layers, 215
Multilayer structures
CO-gas-induced resistance switching in SnO_2/ultrathin Pt sandwich structure, 87

Nafion/Pt composite electrodes
fabrication of polymer electrolyte fuel cell (PEFC) H_2 sensors, 7
Na^+-ISFET/REFET
sodium microsensors based on ISFET/REFET prepared through an ion-implantation process fully compatible with a standard silicon technology, 101
NIR spectroscopy
NIR spectroscopic application of a refractometric sensor, 203
Nitric oxide
NO-sensing properties of Au thin film, 15
Nitrogen oxide
NO gas-sensing characteristics of copper phthalocyanine film prepared by plasma-activated evaporation, 77

Odours
evaluation of the efficiency of deodorants by semiconductor gas sensors, 191
Optical humidity sensors
humidity-sensitive optical absorption of Co_3O_4 film, 157
Organic coatings
calorimetric detection of organic vapours using inclusion reactions with organic coating materials, 71
Orthometallated platinum complexes
fibre-optic oxygen sensor based on luminescence quenching of a Pt(II) complex embedded in polymer matrices, 121
Oscillators
an electronic oscillator with automatic gain control: EQCM applications, 129
Oxygen optodes
fibre-optic oxygen sensor based on luminescence quenching of a Pt(II) complex embedded in polymer matrices, 121
Oxygen optrodes
fibre-optic oxygen sensor based on luminescence quenching of a Pt(II) complex embedded in polymer matrices, 121
Oxygen sensors
an investigation of response time of TiO_2 thin-film oxygen sensors, 83

Paper
a novel paper pH sensor based on polypyrrole, 33
Perovskite titanates
segregation driving forces in perovskite titanates, 93
pH sensors
a novel paper pH sensor based on polypyrrole, 33
dynamic response of a Ta_2O_5-gate pH-sensitive field-effect transistor, 115
Plasma-activated evaporation
NO gas-sensing characteristics of copper phthalocyanine film prepared by plasma-activated evaporation, 77
Polymer electrolyte fuel cells
fabrication of polymer electrolyte fuel cell (PEFC) H_2 sensors, 7
Polymer matrices
fibre-optic oxygen sensor based on luminescence quenching of a Pt(II) complex embedded in polymer matrices, 121
Polypyrrole
a novel paper pH sensor based on polypyrrole, 33
Potentiometric sensors
asymmetric membrane-based potentiometric solid-state ion sensors, 161

Quartz crystal
impedance analysis and circuit simulation of quartz resonator in water at different temperatures, 169
Quartz-crystal mocrobalances
an electronic oscillator with automatic gain control: EQCM applications, 129

Refractive index
first-order surface plasmon resonance sensor system based on a planar light pipe, 137
Resistance
a novel paper pH sensor based on polypyrrole, 33
Resonance frequency
impedance analysis and circuit simulation of quartz resonator in water at different temperatures, 169

Sb_2O_3
influence of Sb/Fe ratio and heating temperature on microstructure and gas-sensing property of Sb_2O_3–Fe_2O_3 complex oxide semiconductors, 185
Screen printing
development of screen-printed enzyme electrodes for the estimation of fish quality, 107
Selectivity
investigation of an intercalation reaction with implications for chemical sensor science, 19
Semiconducting metal oxides
a new automotive air/fuel sensor based on TiO_2-doped Nb_2O_5 thin film by ion-beam-enhanced deposition, 209
Semiconductor gas sensors
evaluation of the efficiency of deodorants by semiconductor gas sensors, 191
Sensitivity
sodium microsensors based on ISFET/REFET prepared through an ion-implantation process fully compatible with a standard silicon technology, 101
Sensitized photoacoustics
a novel acoustic sensing system for on-line hydrogen measurements, 233
Solid-state sensors
asymmetric membrane-based potentiometric solid-state ion sensors, 161
Steplike resistance response
CO-gas-induced resistance switching in SnO_2/ultrathin Pt sandwich structure, 87
Strontium titanate
segregation driving forces in perovskite titanates, 93
Surface plasmon resonance
first-order surface plasmon resonance sensor system based on a planar light pipe, 137
chemical electrode surface plasmon resonance sensor, 143

Surface plasmon resonance spectroscopy
sensing fatty acid binding protein with planar and fiber-optical surface plasmon resonance spectroscopy devices, 149
Surface segregation
segregation driving forces in perovskite titanates, 93

Tantalum oxide
dynamic response of a Ta_2O_5-gate pH-sensitive field-effect transistor, 115
Thermogravimetric analysis
rapid evaluation processes for candidate CO and HC sensor materials; examination of SnO_2, Co_3O_4, and $Cu_xMn_{3-x}O_4$ ($1 < x \leq 1.5$), 49
Thin films
an investigation of response time of TiO_2 thin-film oxygen sensors, 83
Thin metal gas sensors
CO-gas-induced resistance switching in SnO_2/ultrathin Pt sandwich structure, 87
Titania
an investigation of response time of TiO_2 thin-film oxygen sensors, 83

Urea
chemical-imaging sensor using enzyme, 23
Urease
chemical-imaging sensor using enzyme, 23

Visible absorbance change
humidity-sensitive optical absorption of Co_3O_4 film, 157

Water
impedance analysis and circuit simulation of quartz resonator in water at different temperatures, 169

Y_2O_3 doping
synthesis and gas-sensing characteristics of high thermostability γ-Fe_2O_3 powder, 181
